

SITA CONNECT

Addressing all your connectivity needs, anywhere

Are you looking for a single provider offering connectivity anywhere you operate whether at the airport, in your headquarter or in town locations? A provider offering feature-rich managed network services with seasonal options and a flexible SLA? Are you looking for a network that is integrated with all your airport, baggage, passenger and back-office applications no matter who provides them? SITA Connect can help. Delivered on top of the largest network in the world and on top of our best-in-class infrastructure at airports.

ISSUES

Secured IP services delivered to all my town and airport locations while simultaneously ensuring that all of the features and functions we require are delivered within budget.

Flexible connectivity

An offer adapted to all my sites and type of traffic requirements.

Connectivity adapted to my needs in an airport

Addressing seasonal requirements, fast connectivity and the ability to handle traffic growth.

Leverage Internet access

Reducing cost, offloading traffic with lower priority, securing browsing adapted to my needs.

Adapt to cloud environment

Access my cloud applications from anywhere, regardless of my site's type of connectivity.

SOLUTION

SITA Connect offers connectivity anywhere you operate through four sets of capabilities:

Corporate Connect: whether you are based at the airport or in town locations, benefit from dedicated IP bandwidth, all types of traffic, various levels of SLA, integrated Internet services and access to cloud applications.

Community Connect: services specifically designed for airport locations and delivered on top of the SITA shared infrastructure Common Use and Internet traffic.

Internet Connect: Internet-based connectivity from your site to either browse the Internet, offload traffic or build your VPN.

Domestic Connect: allows optimized and cost effective communication between your sites in a same country. Most of the traffic remains local. Solution identified on a case-by-case basis.

BENEFITS

- Access to the largest IP network in the world covering all your destinations
- Access to exclusive SITA owned infrastructure deployed at airports around the world (AirportHub™)
- Access to SITA, to partner or to your own applications in the cloud
- Internet browsing breaking locally or at the cloud
- Seasonal connectivity options for some services
- One contract with simplified pricing and billing
- Rich feature set and levels of SLA
- Premium and light versions available for most services

HOW DOES SITA CONNECT WORK?

SITA CONNECT	Corporate Connect	<ul style="list-style-type: none">• Customer location: town office or airport• Characteristics:<ul style="list-style-type: none">• Adapted SLA per site,• Dedicated bandwidth,• Back and front office traffic,• Internet offload and browsing,• Access to shared ATI communities (ServiceNet),• Access to cloud applications.
	Community Connect	<ul style="list-style-type: none">• Customer location: airport• Characteristics:<ul style="list-style-type: none">• Common Use traffic (local or cloud server)• Shared bandwidth• Shared internet access• Access to shared ATI communities (ServiceNet).
	Internet Connect	<ul style="list-style-type: none">• Customer location: town office or airport• Characteristics:<ul style="list-style-type: none">• Internet bandwidth• Added security / Internet VPN,• Small, medium to large sites.
	Domestic Connect	<ul style="list-style-type: none">• Connect your sites in the same country• Case-by-case.

SITA CONNECT COMPONENTS

The flexibility you need to connect your sites:

1. Corporate Connect

- dedicated bandwidth
- traffic prioritization: 6 CoS (3 data, 1 voice, 1 video, 1 Internet)
- all type of access: LL, Ethernet, Satellite, xDSL, 3G/4G
- rich feature set: Resiliency options, IPv6, multiple VPN, Multicast, others.

2. Community Connect

- shared bandwidth / SITA infrastructure
- access to any DCS and to the Internet

3. Internet Connect

- pure internet connectivity
- naked Internet connections

4. Domestic Connect

- several locations in the same country
- most of the traffic stays in the country
- traffic prioritization
- different types of access

CASE STUDY

A large European airline chose SITA Connect to enjoy the simplicity of having a single contract covering all types of connectivity. This will give the airline access to new technical features, and the opportunity to leverage embedded Internet and cloud access.

The customer defined site profiles based on **business /operational needs, size, location and internet availability**. Most of its applications are in the cloud:

- **Main sites:** CorporateConnect.
- **Large to medium sites:** CorporateConnect or CorporateConnect@Airports with internet offload for browsing (local or gateway).
- **Medium to small sites:** CorporateConnect Light or CorporateConnect@Airports Light* with internet offload for browsing (local or gateway).
- **Small airport sites:** CommunityConnect DCS, CommunityConnect Internet, CorporateConnect Light.
